Career Objective

Detail-oriented and analytical fresher with strong skills in data analysis, visualization, and statistical modeling. Proficient in SQL, Python, Excel, and Power BI. Seeking a Data Analyst role to apply problem-solving and data-driven decision-making skills to deliver actionable insights.

Technical Skills

- **Programming & Analysis:** Python (Pandas, NumPy, Matplotlib, Seaborn), R, Javascript
- **Databases:** MySQL, PostgreSQL
- **Visualization Tools:** Power BI, Excel (Pivot Tables, Power Query, DAX, KPI)
- **Statistics & ML:** Hypothesis Testing, Regression, Classification, Clustering
- **Other Tools:** Git, Jupyter Notebook, Google Analytics

Projects

1. Sales Performance Analysis (Power BI & SQL)

- Analyzed 50,000+ sales records to identify top-performing regions and products.
- Built an **interactive Power BI dashboard** to track KPIs like revenue growth and customer retention.
- Improved sales forecasting accuracy by **15%** using trend analysis.

2. Customer Churn Prediction (Python & Machine Learning)

- Collected and preprocessed telecom customer dataset (~7,000 rows).
- Implemented classification models (**Logistic Regression, Random Forest**) achieving **82% accuracy**.
- Provided data-driven recommendations to reduce churn by **targeting high-risk customers**.

3. E-commerce Product Review Analysis (NLP & Python)

- Scraped and cleaned **10,000 product reviews** from an e-commerce platform.
- Performed **sentiment analysis** using NLP techniques (TF-IDF & Naive Bayes).
- Visualized customer sentiment trends using Matplotlib & Seaborn.

4. Financial Data Analysis (Excel)

- Analyzed **5 years of financial data** of a company.
- Created Tableau dashboards for revenue, expense, and profit trends.
- Automated Excel reports using formulas & pivot tables, reducing reporting time by **40%**.

Education

B.Tech in Computer Science – Greater Noida Institute of Technology

Year of Graduation: 2025 | CGPA: 8.4/10

Relevant Course: Data Analytics, Statistics, Database Management, Machine Learning

Certifications

- Data Visualization with Python – Coursera
- Data Analysis with Python - Coursera
- Databases and SQL for Data Science with Python

Key Strengths

Strong problem-solving and analytical skills

Quick learner with a passion for data-driven decision making

Effective communicator and team player
